CONTENTS OF VOLUME 82

Number 1, 5 January 1974

Richards, F. M., The Interpretation of Protein Structures: Total Volume, Group Volume Distributions and Packing Density 1

Lavers, G. C., Chen, J. H. and Spector, A., The Presence of Polyriboadenylic Acid Sequences in Calf Lens Messenger RNA 15

Davis, L. A. and Hess, G. P., Determination of Dissociation Constants of Crystalline α-Chymotrypsin Complexes. 27

Paul, A. V. and Riley, M., Joint Molecule Formation following Conjugation in Wild Type and Mutant *Escherichia coli* Recipients 35

Richards, O. C. and Ryan, R. S., Synthesis and Turnover of *Euglena gracilis* Mitochondrial DNA. 57

Wishnia, A. and Lappi, S. J., Effector-modulated Subunit Associations in a Model Hydrophobic System 77

Worcel, A. and Burgi, E., Properties of a Membrane-attached Form of the Folded Chromosome of *Escherichia coli* 91

Letters to the Editor:

Delius, H. and Worcel, A., Electron Microscopic Visualization of the Folded Chromosome of *Escherichia coli* 107

Berthou, J., Laurent, A., Lebrun, E. and van Rapenbusch, R., Crystallography of *Bacillus subtilis* Levansucrase 111

Dunker, A. K., Klausner, R. D., Marvin, D. A. and Wiseman, R. L., Filamentous Bacterial Viruses. X. X-ray Diffraction Studies of the R4 A-protein Mutant 115

Announcement 119

Number 2, 15 January 1974

Marvin, D. A., Wiseman, R. L. and Wachtel, E. J., Filamentous Bacterial Viruses. XI. Molecular Architecture of the Class II (Pf1, Xf) Virion . 121

Sharma, V. S., Noble, R. W. and Ranney, H. M., Structure–Function Relation in Hemoglobin Köln (β98 Val → Met) 139

Ojala, D. and Attardi, G., Expression of the Mitochondrial Genome in HeLa Cells. XIX. Occurrence in Mitochondria of Polyadenylic Acid Sequences, "Free" and Covalently Linked to Mitochondrial DNA-coded RNA . 151

Hand, R. and Tamm, I., Initiation of DNA Replication in Mammalian Cells and its Inhibition by Reovirus Infection 175

Cupane, A., Palma, M. U. and Vitrano, E., Dependence of Co-operativity in the Reaction of Haemoglobin with Oxygen on Deuterium Oxide Concentration and Temperature 185

Jay, G. and Kaempfer, R., Host Interference with Viral Gene Expression: Mode of Action of Bacterial Factor i 193

Jacobson, A., Firtel, R. A. and Lodish, H. F., Synthesis of Messenger and Ribosomal RNA Precursors in Isolated Nuclei of the Cellular Slime Mold *Dictyostelium discoideum* 213

Herzfeld, J. and Stanley, H. E., A General Approach to Co-operativity and its Application to the Oxygen Equilibrium of Hemoglobin and its Effectors 231

Appendix: Calculation of the Partition function for a General System . 259

Letters to the Editor:

Berns, K. I. and Kelly, T. J., Jr, Visualization of the Inverted Terminal Repetition in Adeno-associated Virus DNA 267

Chang, F. N., Wang, Y. J., Fetterolf, C. J. and Flaks, J. G., Unequal Contribution to Ribosomal Assembly of Both *str* Alleles in *Escherichia coli* Merodiploids and its Relationship to the Dominance Phenomenon 273

Number 3, 25 January 1974

Greer, J., Three-dimensional Pattern Recognition: An Approach to Automated Interpretation of Electron Density Maps of Proteins . . . 279

Stambrook, P. J., The Temporal Replication of Ribosomal Genes in Synchronized Chinese Hamster Cells 303

Perry, R. P., Kelley, D. E. and LaTorre, J., Synthesis and Turnover of Nuclear and Cytoplasmic Polyadenylic acid in Mouse L Cells . . . 315

Butler, P. J. G., Structures and Roles of the Polymorphic Forms of Tobacco Mosaic Virus Protein. VIII. Elongation of Nucleoprotein Rods of the Virus RNA and Protein 333

Butler, P. J. G., Structures and Roles of the Polymorphic Forms of Tobacco Mosaic Virus Protein. IX. Initial Stages of Assembly of Nucleoprotein Rods from Virus RNA and the Protein Disks 343

Isono, S. and Yourno, J., Non-suppressible Addition Frameshift in *Salmonella* 355

Jelinek, W., Molloy, G., Fernandez-Munoz, R., Salditt, M. and Darnell, J. E., Secondary Structure in Heterogeneous Nuclear RNA: Involvement of Regions from Repeated DNA Sites 361

Diamond, R., Real-space Refinement of the Structure of Hen Egg-white Lysozyme 371

Levitt, M., Energy Refinement of Hen Egg-white Lysozyme . . . 393

Letter to the Editor:

Eaton, B. L. and Pepe, F. A., Myosin Filaments showing a 430 Å Axial Repeat Periodicity 421

Number 4, 5 February 1974

Pratt, D., Laws, P. and Griffith, J., Complex of Bacteriophage M13 Single-stranded DNA and Gene *5* Protein 425

Chiu, N., Chiu, A.O.S. and Suyama, Y., Three Isoaccepting Forms of Leucyl Transfer RNA in Mitochondria 441

Grunberger, D., Blobstein, S. H. and Weinstein, I. B., Modification of Ribonucleic Acid by Chemical Carcinogens. VI. Effect of *N*-2-Acetylaminofluorene Modification of Guanosine on the Codon Function of Adjacent Nucleosides in Oligonucleotides 459

Cowan, N. J. and Milstein, C., Stability of Cytoplasmic Ribonucleic Acid in a Mouse Myeloma: Estimation of the Half-life of the Messenger RNA Coding for an Immunoglobulin Light Chain 469

Minton, A. P., A Thermodynamic Model for Gelation of Sickle-cell Hemoglobin 483

Bonaventura, J., Bonaventura, C., Brunori, M., Giardina, B., Antonini, E., Bossa, F. and Wyman, J., Functional Properties of Carboxypeptidase-digested Hemoglobins 499

MATTHEWS, B. W., Determination of Molecular Weight from Protein Crystals . 513

MATSUBARA, I. and MILLMAN, B. M., X-ray Diffraction Patterns from Mammalian Heart Muscle 527

MALCHY, B. and KAPLAN, H., Reactive Properties of the Amino Groups of Histones in Calf Thymus Chromatin 537

SCHLESSINGER, J. and LEVITZKI, A., Molecular Basis of Negative Co-operativity in Rabbit Muscle Glyceraldehyde-3-phosphate Dehydrogenase 547

BUEHNER, M., FORD, G. C., MORAS, D., OLSEN, K. W. and ROSSMANN, M. G., Structure Determination of Crystalline Lobster D-Glyceraldehyde-3-phosphate Dehydrogenase 563

LETTER TO THE EDITOR:

PALM, W. and COLMAN, P. M., Preliminary X-ray Data from Well-ordered Crystals of a Human Immunoglobulin G Molecule 587

Index to Volume 82

N-2-Acetylaminofluorene modification of guanosine, effect on the codon function of adjacent nucleosides in oligonucleotides, 459
Adeno-associated (see Virus), 267
Addition frameshift, non-suppressible in *Salmonella*, 355
Amino groups of histones in calf thymus chromatin, reactive properties, 537
Antonini, E., (see also Bonaventura, J.), 499
Attardi, G. (see also Ojala, D.), 151

Bacillus subtilis levansucrase crystallography, 111
Bacterial factor, i mode of action, 193
— viruses, filamentous, molecular architecture of the class II (Pf1, Xf) virion, 121
— — —, X-ray diffraction studies of the R4 A-protein mutant, 115
Bacteriophage M13 single-stranded DNA and gene *5* protein complex, 425
Berns, K. I. & Kelly, T. J., Jr, Visualization of the inverted terminal repetition in adeno-associated virus DNA, 267
Berthou, J., Laurent, A., Lebrun, E. & van Rapenbusch, R., Crystallography of *Bacillus subtilis* levansucrase, 111
Blobstein, S. H. (see also Grunberger, D.), 459
Bonaventura, C. (see also Bonaventura, J.), 499
Bonaventura, J., Bonaventura, C., Brunori, M., Giardina, B., Antonini, E., Bossa, F. & Wyman, J., Functional properties of carboxypeptidase-digested hemoglobins, 499
Bossa, F. (see also Bonaventura, J.), 499
Brunori, M. (see also Bonaventura, J.), 499
Buehner, M., Ford, G. C., Moras, D., Olsen, K. W. & Rossman, M. G., Structure determination of crystalline lobster D-glyceraldehyde-3-phosphate dehydrogenase, 563
Burgi, E. (see also Worcel, A.), 91
Butler, P. J. G., Structures and roles of the polymorphic forms of tobacco mosaic virus protein. VIII. Elongation of nucleoprotein rods of the virus RNA and protein, 333
— — — — — — — — — — — — — —. IX. Initial stages of assembly of nucleoprotein rods from virus RNA and protein disks, 343

Calf lens mRNA, presence of polyriboadenylic acid sequences, 15
— thymus chromatin histone amino group reactive properties, 537
Carboxypeptidase-digested hemoglobins, functional properties, 499
Carcinogens, chemical, RNA modification, 459
Chang, F. N., Wang, Y. J., Fetterolf, C. J. & Flaks, J. G., Unequal contribution to ribosomal assembly of both *str* alleles in *Escherichia coli* merodiploids and its relationship to the dominance phenomenon, 273
Chemical carcinogens, RNA modification, 459
Chen, J. H. (see also Lavers, G. C.), 15
Chinese hamster cells, synchronized temporal replication of ribosomal genes, 303
Chiu, A. O. S. (see also Chiu, N.), 441
Chiu, N., Chiu, A. O. S. & Suyama, Y., Three isoaccepting forms of leucyl transfer RNA in mitochondria, 441
Chromatin, calf thymus, reactive properties of the amino groups of the histones, 537
α-Chymotrypsin complexes, crystalline, dissociation constant determination, 27
Codon function of adjacent nucleosides in oligonucleotides, effect of *N*-2-acetylaminofluorene modification of guanosine, 459
Colman, P. M. (see also Palm, W.), 587
Conjugation in wild type and mutant *Escherichia coli* recipients, joint molecule formation, 35
Co-operativity and its application to the oxygen equilibrium of hemoglobin and its effectors, 231
Cowan, N. J. & Milstein, C., Stability of cytoplasmic ribonucleic acid in a mouse myeloma: estimation of the half-life of the mRNA coding for an immunoglobulin light chain, 469
Crystalline α-chymotrypsin complexes, dissociation constant determination, 27
— lobster D-glyceraldehyde-3-phosphate dehydrogenase, structure determination, 563

Crystallography of *Bacillus subtilis* levansucrase, 111
Crystals of protein, molecular weight determinations, 513
—, well ordered, of a human immunoglobin G molecule, preliminary X-ray data, 587
Cupane, A., Palma, M. U. & Vitrano, E., Dependence of co-operativity in the reaction of hemoglobin with oxygen on deuterium oxide concentration and temperature, 185
Cytoplasmic and nuclear polyadenylic acid synthesis and turnover in mouse L cells, 315
— RNA stability in a mouse myeloma, 469

Darnell, J. E. (see also Jelinek, W.), 361
Davis, L. A. & Hess, G. P., Determination of dissociation constants of crystalline α-chymotrypsin complexes, 27
Dehydrogenase for D-glyceraldehyde-3-phosphate, crystalline, lobster, structure determination, 563
— — glyceraldehyde-3-phosphate of rabbit muscle, negative co-operativity, 547
Delius, H. & Worcel, A., Electron microscopic visualization of the folded chromosome of *Escherichia coli*, 107
Deoxyribonucleic acid, involvement of regions from repeated sites in secondary structure in heterogeneous nuclear RNA, 361
— —, mitochondrial, synthesis and turnover in *Euglena gracilis*, 57
— —, occurrence in mitochondria of polyadenylic acid sequences "free" and covalently linked to mitochondrial DNA-coded RNA, 151
— — of adeno-associated virus, visualization of the inverted terminal repetition, 267
— — replication initiation in mammalian cells and its inhibition by reovirus infection, 175
— —, single-stranded of bacteriophage M13, complex with gene *5* protein, 425
Deuterium oxide concentration and temperature, effect on reaction of haemoglobin with oxygen, 185
Diamond, R., Real space refinement of the structure of hen eggwhite lysozyme, 371
Dictyostelium discoideum, messenger and ribosomal RNA precursor synthesis in isolated nuclei, 213
Dissociation constant determination for crystalline α-chymotrypsin complexes, 27
Dominance phenomenon relationship to unequal contribution to ribosomal assembly of both *str* alleles in *Escherichia coli* merodiploids, 273
Dunker, A. K., Klausner, R. D., Marvin, D. A. & Wiseman, R. L., Filamentous bacterial viruses. X. X-ray diffraction studies of the R4 A-protein mutant, 115

Eaton, B. L. & Pepe, F. A., Myosin filaments showing a 430 Å axial repeat periodicity, 421
Effector-modulated subunit associations in a model hydrophobic system, 77
Egg-white lysozyme, hen, real-space structure refinement, 371
Electron density maps of proteins, an approach to automated interpretation, 279
— microscopic visualization of the folded chromosome of *Escherichia coli*, 107
Energy refinement of hen egg-white lysozyme, 393
Escherichia coli folded chromosome, electron microscopic visualization, 107
— —, joint molecule formation following conjugation in wild type and mutant recipients, 35
— —, properties of a membrane-attached form of the folded chromosome, 91
— —, unequal contribution to ribosomal assembly of both *str* alleles in merodiploids and its relationship to the dominance phenomenon, 273
Euglena gracilis mitochondrial DNA synthesis and turnover, 57
Expression of viral gene, host interference, mode of action of bacterial factor i, 193

Fernandez-Munoz, R. (see also Jelinek, W.), 361
Fetterolf, C. J. (see also Chang, F. N.), 273
Filamentous bacterial viruses, molecular architecture of the class II (Pf1, Xf) virion, 121
Firtel, R. A. (see also Jacobson, A.), 213
Flaks, J. G. (see also Chang, F. N.), 273
Folded chromosome of *Escherichia coli*, electron microscopic visualization, 107
— — — — —, properties of the membrane-attached form, 91
Ford, G. C. (see also Buehner, M.), 563
Frameshift, non-suppressible addition in *Salmonella*, 355

G molecule of human immunoglobin, preliminary X-ray data from well-ordered crystals, 587
Gelation of sickle-cell hemoglobin, thermodynamic model, 483
Giardina, B. (see also Bonaventura, J)., 499
D-Glyceraldehyde-3-phosphate dehydrogenase of rabbit muscle, negative co-operativity, 547
Glyceraldehyde-3-phosphate dehydrogenase, crystalline D form of lobster, structure determination, 563
Greer, J., Three-dimensional pattern recognition: an approach to automated interpretation of electron maps of proteins, 279
Griffith, J. (see also Pratt, D.), 425
